

METHOD AND APPARATUS FOR OFFLINE PAYMENT, SERVICE PROCESSING, AND PAYMENT PROCESSING

ABSTRACT

5 The present specification discloses a method and an apparatus for offline
payment, service processing, and payment processing. When both a collection device
and a payment device are in an offline state, the collection device can send payment
data to the payment device through a communication connection established to the
payment device, so that the payment device can perform payment processing based on
the payment data, to obtain a payment result, and return the payment result to the
10 collection device, and the collection device can perform collection processing based
on the payment result and obtained account information of the payment device, to
obtain a collection result.
