(54) Title: METHOD AND APPARATUS FOR SWITCHING SEARCH ENGINE TO REPEAT SEARCH

FIG. 1

(57) Abstract: A method is provided for switching search engine to repeat search are provided herein. The method includes generating a fixed search wrapper in a page or a window pre-determined by a browser, and the page or the window can be nested within the search wrapper. Further, the method includes displaying the search wrapper in a search results page of a first search engine when a user selects the first search engine listed in the browser to perform a search, and other search engine options can be displayed in the search wrapper. Still further, the method includes repeating the search using current search keywords through a second search engine selected by the user from the other search engine options, when the user requests to switch to the selected second search engine to repeat the search.
