(54) Title: LOW TEMPERATURE ELECTRONIC VAPORIZATION DEVICE AND METHODS

FIG. 1

(57) Abstract: Low temperature electronic vaporization devices and method are described herein for emulating smoking wherein the devices generate an aerosol for inhalation by a subject by heating a viscous material that can have a tactile response in the mouth or respiratory tract. A device for generating an inhalable aerosol is provided herein comprising: a mouthpiece, a body; an electronic heater within said body comprising a printed circuit board to heat a viscous vaporizable material to a generate an inhalable aerosol; and a temperature regulator.
