(54) Title: USE OF MEASUREMENT PILOT FOR RADIO MEASUREMENT IN A WIRELESS NETWORK

(57) Abstract: Various embodiments are disclosed relating to use of a measurement pilot for radio measurement in a wireless network, such as, for example, for use in the measurement and generation of beacon reports. In an example embodiment, a radio measurement request (300) may be received from a requesting wireless node (104, 114) and a measurement pilot frame (200) may be received from one or more wireless nodes (104, 106, 108, 114, 118, 116). A radio measurement report (500) may be generated based, at least in part, on the measurement pilot frame (200) from one or more wireless nodes. The radio measurement report (500) may be transmitted to the requesting wireless node (104, 114).
