

TITLE OF INVENTION:

DATA CORRECTION DEVICE, DATA CORRECTION METHOD, AND DATA
CORRECTION PROGRAM

5

ABSTRACT

[Issue] To perform suitable data correction for a data shift. [Solution] A data
correction device according to the disclosure performs correction on new data in which a
data shift has occurred. The data correction device includes: a calculation unit, calculating
10 a correction parameter based on a correspondence relationship between existing normal data
and new normal data in a periodic interval in a same process; and a correction unit,
correcting the new data by using the correction parameter that is calculated.
