

STRUCTURE FOR PREVENTING MISINSERTION OF DISC
CARTRIDGESABSTRACT OF THE DISCLOSURE

5 A disc cartridge includes a shell having one
side face and an opening, a shutter mounted to the
shell to be slidable along the one side face between a
first position where the shutter closes the opening and
a second position where the shutter opens the opening,
and a misinsertion preventing portion arranged with the
one side face of the shell in a portion thereof out of
10 a slide area of the shutter and having a recess for
allowing introduction of a misinsertion preventing
member of a drive.
