(54) Title: SYSTEM AND METHOD FOR QUEUING TALK REQUESTS IN WIRELESS DISPATCH SYSTEM

(57) Abstract: A push to talk wireless dispatch service includes a media control unit that establishes, while one remote unit has the floor and push to talk (PTT) signals are received from other remote units, a queue of remote units based the respective times of receipt of the PTT signals and/or priorities of transmission. The transmission channel of the dispatch service, when released by a speaking unit, is granted to the next remote unit in the queue, and so on.
