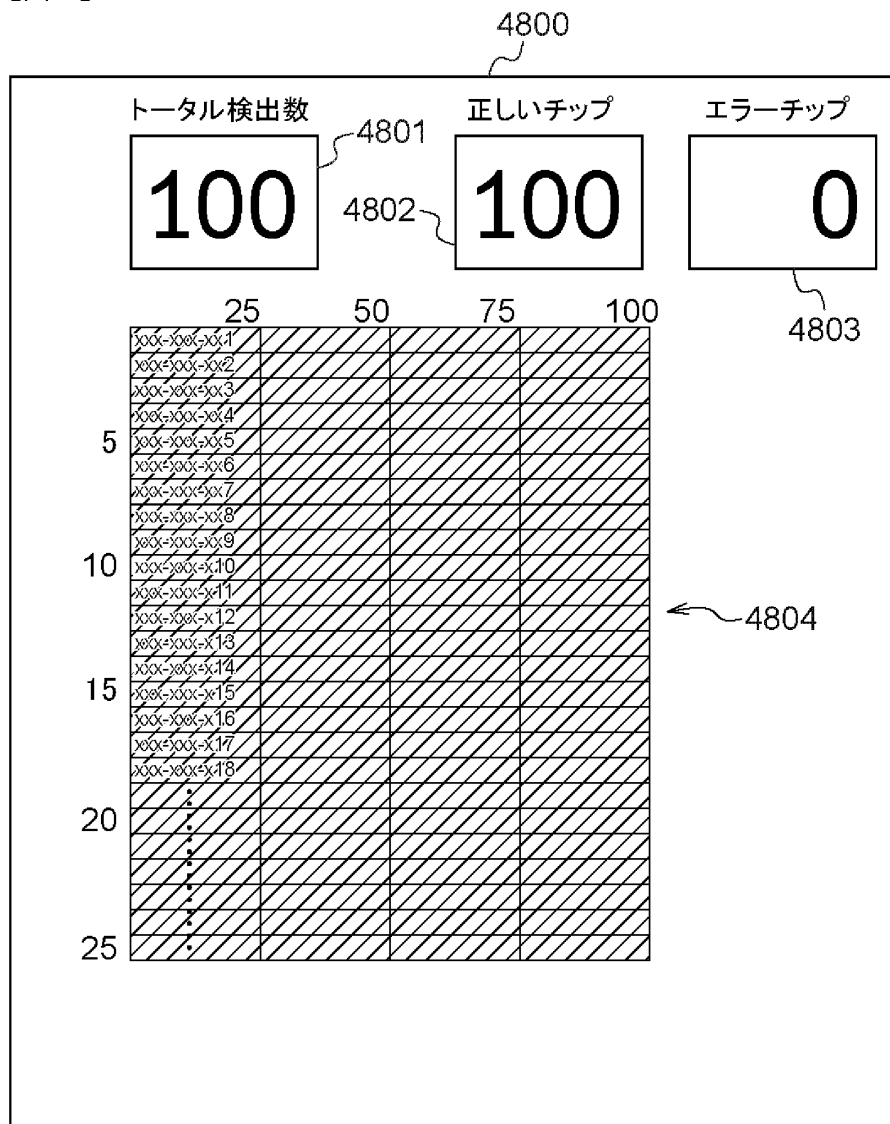

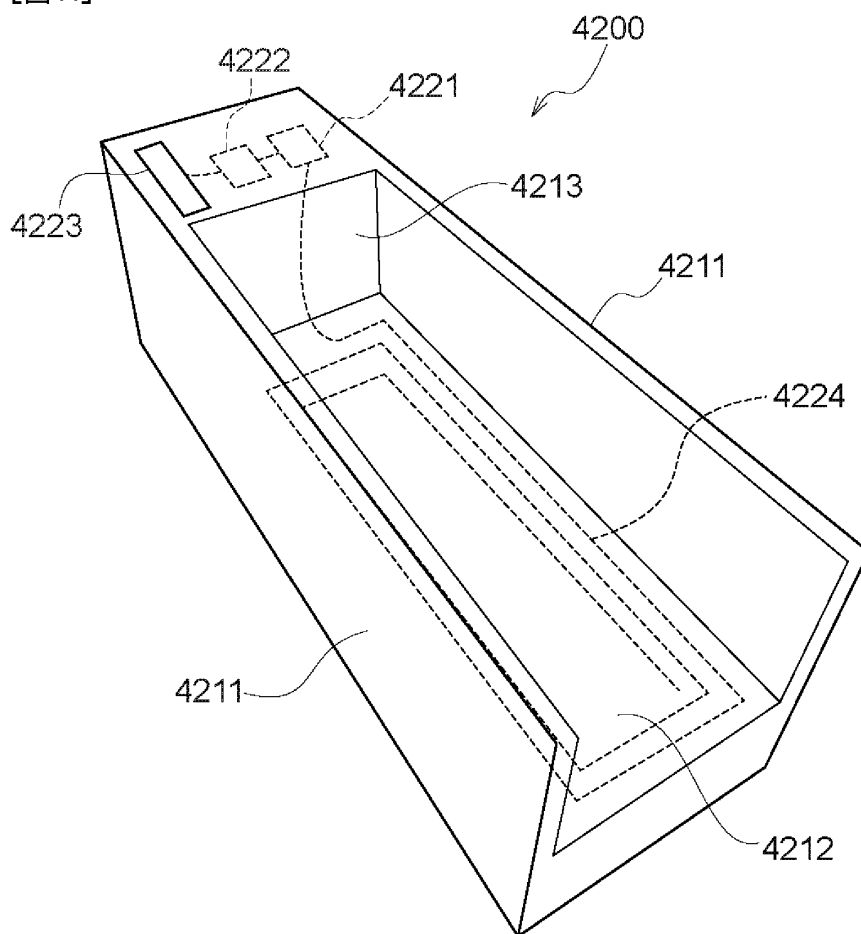

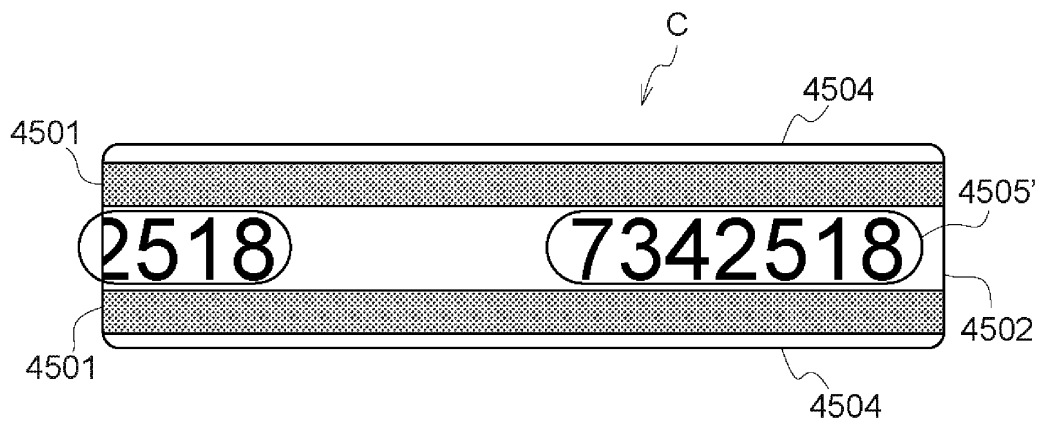

Figure 1 is a diagram illustrating a data structure. It features a large grid of data points (4800) and a corresponding 2D array of results (4801, 4802, 4803, 4804, 4805). The array is divided into four quadrants: Total Detection Count (100), Correct Chips (99), Error Chips (1), and a small box (4805) containing 'xxx-xxx-xxx'. The array is labeled with '25', '50', '75', and '100' on the top and '5', '10', '15', '20', and '25' on the left. A label '4800' points to the top right corner. A label '4804' points to the bottom right corner. A label '4805' points to the small box. A label '4801' points to the '100' box. A label '4802' points to the '99' box. A label '4803' points to the '1' box. A label '4804' points to the bottom right corner. A label '4805' points to the small box.
