

ACARINE TRAPPING PRODUCT AND ACARINE TRAPPING METHOD

ABSTRACT

Provided is an acarine trapping product that has an
5 excellent acarine attracting effect and is capable of reliably
and safely trapping and getting rid of attracted acarines.
This acarine trapping product comprises a fibrous structural
body 10 having nap, and a sticky body 20 configured to cause
acarines to get stuck thereon. The fibrous structural body 10
10 includes fibers having an elongation percentage of at most
10%. The fibrous structural body 10 is a woven or knitted
fabric having a yarn density of 10 to 100 strands/10cm, and
includes at least bast fibers and/or seed hair fibers. An
attracting agent 30 is provided between the fibrous structural
15 body 10 and the sticky body 20, and at least a portion of the
fibrous structural body 10 is covered by an air-permeable
sheet 40 that does not have nap.
