(54) Title: METHODS OF SOLUBILIZING ALKYL POLYOLS

(57) Abstract: Method of improving the solubility of alkyl polyol in a lubricating oil composition is described. The method includes lubricating the engine with a lubricating oil composition having a major amount of an oil of lubricating viscosity; alkyl polyol having 2 to 20 carbon atoms; and a solubility-enhancing additive comprising a detergent, dispersant, or anti-wear additive. The amount of alkyl polyol is from about 0.001 wt. % to about 0.5 wt. % based on the total weight of the lubricating oil composition.
