

CLASSIFIED DISPLAY SYSTEM AND CLASSIFIED DISPLAY METHOD OF CENTRALIZED MARKET ACTIVITY

ABSTRACT

A classified display method of centralized market activity is disclosed and includes: obtaining a trading data; determining a current bid-ask price status; labeling a trading attribute for the trading data based on the bid-ask price status; deciding a displaying position of the trading data based on the trading attribute; identifying a trader identity based on a trading volume of the trading data; deciding a displaying pattern based on the trader identity; updating displaying data of an actual activity graph; and, updating a displaying figure of the actual activity graph.
