ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: RELATIONAL MODEL FOR MANAGEMENT INFORMATION IN NETWORK DEVICES

(57) Abstract: Apparatuses and methods for system management in a heterogeneous environment are provided. For example, relational query from a software application requesting management information from a specified information source is received and translated to native protocol messages according to an access protocol associated with the information source. The native protocol messages are handled as a transaction with the information source and a result of the transaction is returned to the software applica-
tion.
