(54) Title: DELIVERING FLUIDS OR GRANULAR SUBSTANCES BY PROJECTING SHELLED PORTIONS THEREOF

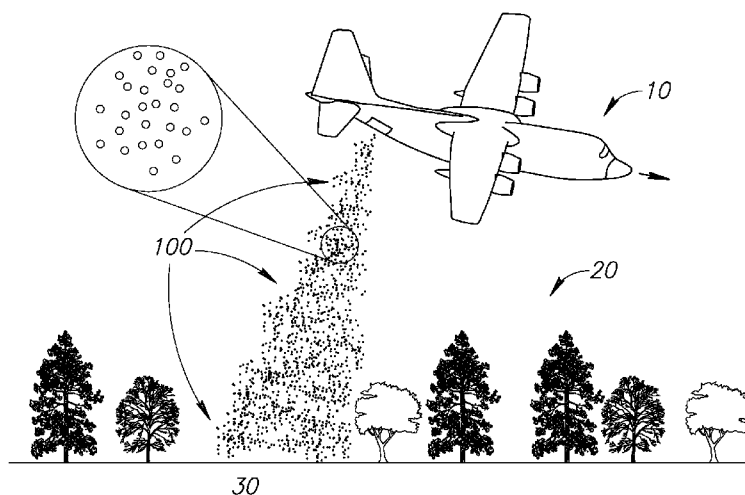

Figure 2

(57) Abstract: A method of delivering over the air, shelled portions (110) of fluids or granular substances (120) containing effective ingredients, to a target, is provided herein. The method includes the following stages: selecting (630) a type and a size of the shelled portions (110) containing the required effective ingredients (120), based on mission parameters (610) and physical data of a scene containing the target; conveying (640) the shelled portions (110) to a delivery point, based on the mission parameters and the physical data; and ballistically delivering (650) the shelled portions towards the target, wherein the shelled portions comprise fluids or granular substances (120) covered by shells (130) that provide the shelled portions a ballistic coefficient that is significantly higher than a ballistic coefficient of similar portions without the shells.
