

ENVIRONMENT ADJUSTMENT SYSTEM, ENVIRONMENT ADJUSTMENT
METHOD AND ENVIRONMENT ADJUSTMENT PROGRAM

ABSTRACT

A request acquisition unit (210) acquires a request regarding a subject
5 environment which is an indoor environment to be adjusted. A control details decision
unit (220) decides, based on the acquired request, details of adjustment by an
adjustment device which is for adjusting the subject environment, and details of
operation of a facility device which is a device of a different type from the adjustment
device and affects the subject environment. A device control unit (230) controls the
10 adjustment device according to the details of adjustment decided, and controls the
facility device according to the details of operation decided.
