(54) Title: SUBSTITUTED HETEROCYCLIC ACYL-TRIPEPTIDES USEFUL AS THROMBIN RECEPTOR MODULATORS			
(57) Abstract The invention is directed to substituted heterocyclic acyl-tripeptides useful as thrombin receptor modulators, their use in wound healing and preventing platelet aggregation. Pharmaceutical compositions comprising the substituted heterocyclic acyl-tripeptides of the present invention and methods of treating conditions mediated by the thrombin receptor are also disclosed.
