(54) Title: A METHOD OF RESOLVING A NON-LATIN CHARACTER URL

(57) Abstract: A method of resolving a non-Latin character URL, having a domain name, entered by a user using an Internet browser comprising the steps of: contacting a website supporting non-Latin character URL resolution, downloading a non-Latin character URL input program from the website, inputting the URL using the program and sending the URL to the website; determining at the website, using the character set of the URL, one or more name servers that support domain names in the selected character set; querying from the website at least one said name server with the domain name; fetching contents from the URL if the query is satisfied and passing the contents to the user.
