(54) Title: IMPREGNATING DEVICE AND METHOD

Fig. 1

(57) **Abstract:** The present invention describes an apparatus as well as a method for applying a surface treatment such as impregnation agent or water repellency agent to an item in particular shoes, boots, bags, gloves or the like, where the apparatus comprises a closed treatment chamber provided with an openable access feature providing access to the treatment chamber from outside the treatment chamber, and where in the vicinity of the bottom of the treatment chamber a turntable is provided said turntable has a flat surface in a x-y plane, and furthermore that the turntable is rotatable around an axis Z orthogonal to said x-y plane, and where one or more nozzles are arranged inside the treatment chamber directed for spraying a mist towards the turntable where said one or more nozzles is/are connected to a control unit, and where a plurality of markers are provided on the periphery of the turntable, and that inside the treatment chamber a scanner for register- ing the markers is provided where input from the scanner is used as input to the control unit,
