

ABSTRACT

Mounting Device

The invention relates to a mounting device (10) for the concealed wall-flush installation of an electrical installation device (10) with a supporting ring (18) in a wall mounting box (14) inserted in a wall (12). The mounting device (22) is arranged on holding brackets (20) of the wall mounting box (14), which includes an adaptor ring (22) which, being inserted at the front side of the wall mounting box (14), overlaps the box and is provided with an opening (23) to accommodate the installation device (10), that is resting on the mounting device via its supporting ring (18).
