

TERMINAL DEVICE UPGRADE METHOD, APPARATUS, ELECTRONIC DEVICE, AND STORAGE MEDIUM

ABSTRACT

The present disclosure provides a method and apparatus for upgrading a terminal device, an electronic device, and a storage medium. The method for upgrading a terminal device comprises: in response to a software upgrade request being acquired, acquiring a target upgrade task to be processed; sending device state acquisition instructions to a plurality of devices to be upgraded which are associated with the target upgrade task, and receiving device state information returned by each device to be upgraded; on the basis of the device state information returned by each device to be upgraded, determining at least one upgradeable device from the plurality of devices to be upgraded; and sending a software data package to be upgraded to each upgradeable device, the upgradeable device being used to perform software upgrading on the basis of the software data package to be upgraded.
