(54) Title: SYSTEM FOR THE TRANSMISSION OF LIQUIDS IN A ROTATABLE BUILDING

FIG. 4A

(57) Abstract: A system (1) for transmitting liquids between a stationary core (2) and a rotatable story (3) of a building (4) comprises an annular buffer duct (6) having an annular lower duct portion (7) and an upper duct portion (8) arranged from above in liquid communication with the lower duct portion (7) and slidingly engaging the lower duct portion (7) via at least one interface (9) extending along the entire circumferential length of the buffer duct (6), the lower duct portion (7) and the upper duct portion (8) being fixed to the stationary core (2) and the rotatable story (3) respectively, or vice versa, so that upon rotation of the story (3) with respect to the core (2), the lower and upper duct portions (7, 8) rotate relative to each other.
