ABSTRACT

The present invention discloses a method and an apparatus for reporting information by a terminal, and a computer storage medium. The method includes: sending, by the terminal, a first message to a RAN entity, the first message including a first identifier and UE related information, so as to send a second message to a UPF entity through the RAN entity, the second message including the first identifier and the UE related information, and to send the UE related information to an SMF entity through the UPF entity after identifying the first identifier in the second message through the UPF entity, and then to send the UE related information to a PCF entity through the SMF entity.
