(54) Title: OUTDOOR UNIT OF AIR CONDITIONER

(57) Abstract: An air conditioner outdoor unit (1) comprises a case having a rectangular shape and composed of side panels (4, 4--), in which a machine chamber (3) and a heat exchanger chamber (2) are defined so as to be vertically aligned, with the heat exchanger chamber disposed above the machine chamber (3) and sectioned by a partition plate (12) which also acts as a drain pan, the side panels surrounding the heat exchanger chamber are formed with air suction ports (4a, 4a --). The outdoor unit (1) further comprises a heat exchanger unit (17, 18) having four side wall sections of which at least two opposing two sections are inclined inwardly by a predetermined angle with respect to inner surfaces of the side panels to which the air suction ports are formed. The outdoor unit case also contains a duct unit (20) arranged in association with the drain pan (12) for discharging drain and cooling an electrical part such as a heat sink (22).
