

ABSTRACT

A palm-swiping device, relating to the technical field of electronic devices. The palm-swiping device comprises a housing (1), a PCB (2), and a camera (3). The PCB (2) and the camera (3) are both located inside the housing (1). The housing (1) is provided with an image capturing window (120), and the projection of the camera (3) on the image capturing window (120) is offset downward relative to a central point (o) of the image capturing window (120).
