(54) Title: METHOD FOR MANUFACTURING BANDED PROJECTILES INTENDED FOR FIRING FROM RIFLED BARRELS AND PROJECTILES MADE ACCORDING TO THE METHOD, AND METHOD FOR UTILIZING THEIR SPECIAL CHARACTERISTICS IMPARTED BY THE METHOD FOR MANUFACTURE WHEN FIRING THESE PROJECTILES

(57) Abstract: In its simplest form the present invention comprises a new method for manufacturing projectiles (1, 11-12 and 19) provided with bands (4, 9, 16), whilst according to a further development of the invention, the facility is afforded for manufacturing artillery projectiles (1, 11-12) according to the same basic principle, which can alternatively be launched from a rifled barrel with or without any spin, along with the facility, according to a new method, for launching spin-free projectiles (6) from rifled barrels without the use of so-called slipping plastic bands.
