Figure 1

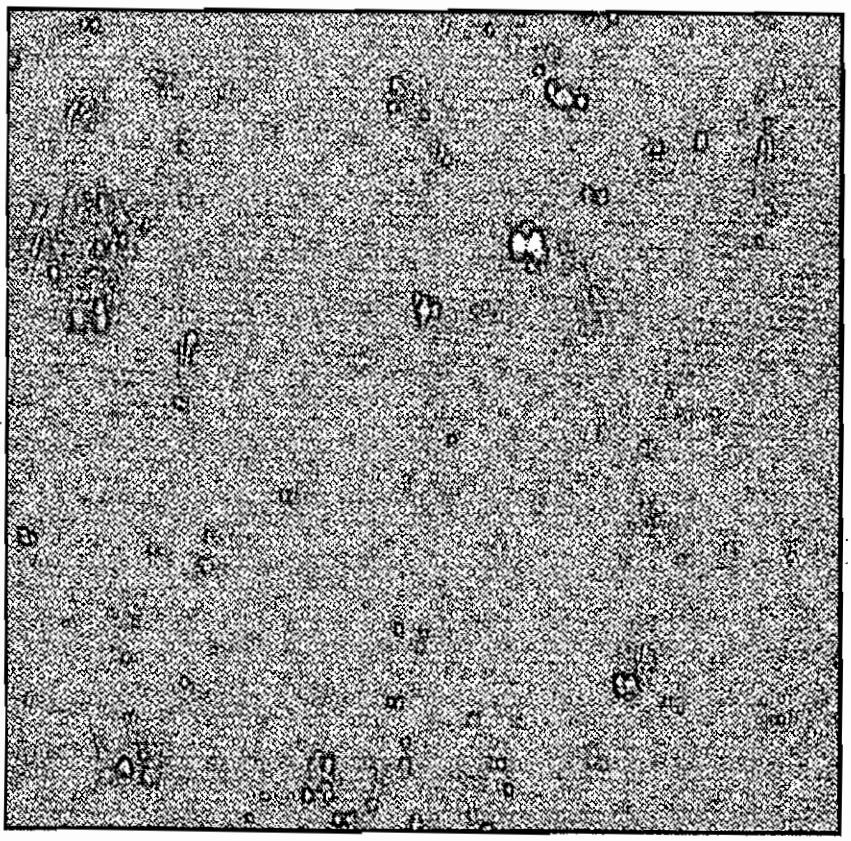

Figure 1: Polarization microscopic photograph of the phospholipid/water dispersion. Lamellar membrane-forming structures are shown as Maltese crosses.

Figure 2

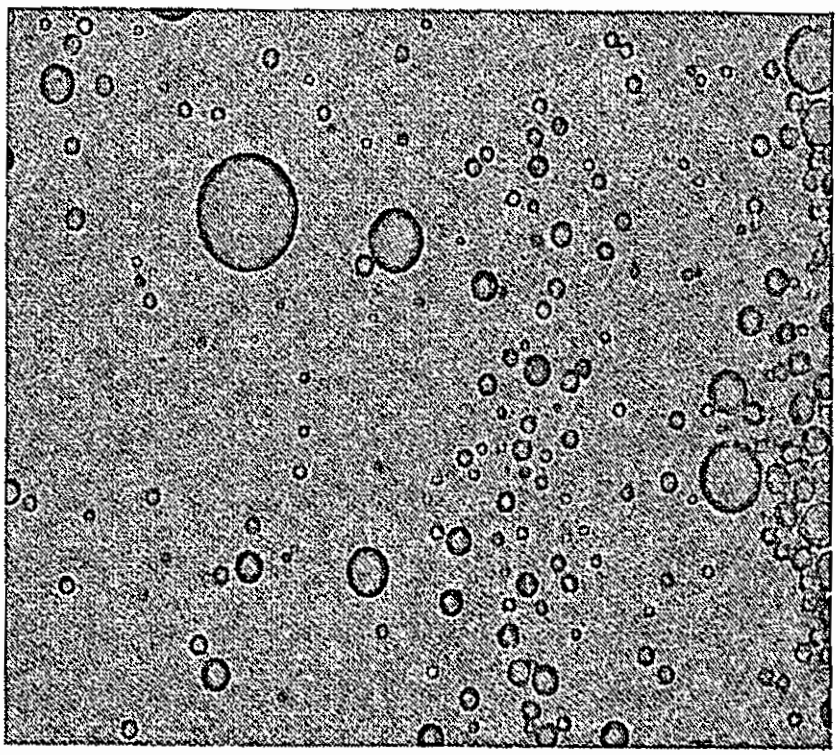

Figure 2: Polarization microscopic photograph of the foam cream. Lamellar membrane-forming structures are shown as Maltese crosses on the boundary surface of the gas bubbles of the foam (e.g. upper left area).

Figure 3

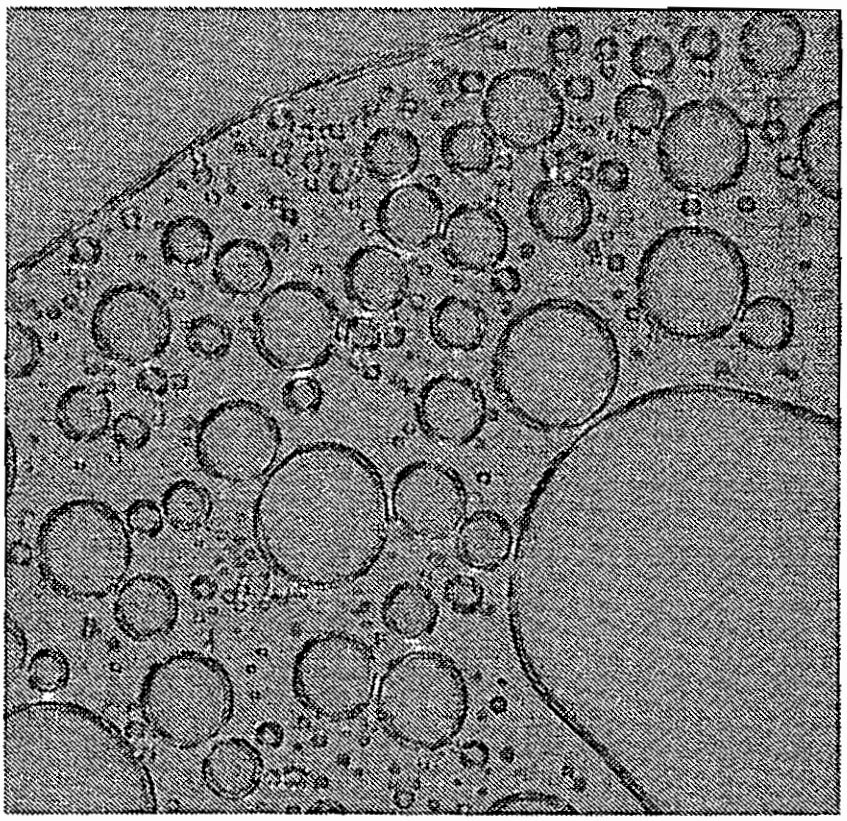

Figure 3: Polarization microscopic photograph of the foam cream. Lamellar membrane-forming structures are shown as Maltese crosses at the boundary surface of the gas bubbles of the foam.
