CLAIMS

1. Use of a compound represented by the following chemical structural formula:

or a pharmaceutically acceptable salt thereof as an active ingredient in the manufacture of a therapeutic or preventive medicament for an eye disease selected from the group consisting of age-related macular degeneration, diabetic retinopathy, macular edema, retinal vein occlusion, neovascular maculopathy and neovascular glaucoma.

2. The use according to claim 1, wherein the age-related macular degeneration is exudative age-related macular degeneration.

3. The use according to claim 1, wherein the macular edema is diabetic macular edema or macular edema following branch retinal vein occlusion.

4. The use according to claim 1, wherein the retinal vein occlusion is central retinal vein occlusion.

5. The use according to claim 1, wherein the therapeutic or preventive medicament is in a dosage form suited for oral administration.

6. The use according to claim 1, wherein the therapeutic or preventive medicament is in a dosage form suited for ophthalmic local administration.

7. The use according to claim 6, wherein an administration site is a vitreous body.

8. The use according to claim 6 or 7, wherein the dosage form is an injection.
