

ABSTRACT

Disclosed is a pressure sensitive adhesive sheet (100) including a first release film (1) temporarily adhered to one principal surface of a pressure sensitive adhesive layer (5) and a second release film (2) temporarily adhered to the other principal surface of the pressure sensitive adhesive layer (5). The first release film (1) and the second release film (2) have release layers (11 and 12), respectively on a first principal surface of a film substrate (10 and 20). A peeling force between the first release film (1) and the pressure sensitive adhesive layer (5) is smaller than a peeling force between the second release film (2) and the pressure sensitive adhesive layer (5). At least one of the first release film (1) and the second release film (2) has an antistatic layer (31, 32) on a second principal surface of the film substrate (10, 20).
