

Abstract

Adhesive Member and Assembly Thereof, and Anti-counterfeiting Packaging Device

5 The present disclosure relates to an adhesive member, comprising: an adhesive layer; and a first layer disposed on the top side of the adhesive layer, wherein the first layer is fixed to the adhesive layer, and the first layer is provided on its outer surface with a lottery ticket part, and the lottery ticket part is directly formed on the outer surface of the first layer. The present disclosure further relates to an adhesive member assembly, comprising at least two of the aforesaid adhesive
10 members, and the at least two adhesive members are placed side by side or stacked on each other. The present disclosure further relates to an anti-counterfeiting packaging device, comprising: a housing, wherein the housing defines an accommodation space, the housing is provided with a tearing part, the tearing part serves as a portion of the housing, the tearing part and the other parts of the housing are connected by a tearable part, the tearing part is provided on its outer surface with a
15 lottery ticket part, and the lottery ticket part is directly formed on the outer surface of the tearing part. Based on the aforesaid solutions, a lottery ticket may be used to provide an anti-counterfeiting function for a commodity.
