ABSTRACT

It is an object of the present invention to provide an anti-CDH3 humanized antibody-drug conjugate that more efficiently kills cancer cells expressing CDH3 by generating a novel humanized anti-CDH3 antibody and using this antibody. According to the present invention, provided is an antibody of any of the following antibodies:

(1) an anti-CDH3 humanized antibody comprising a heavy chain variable region consisting of an amino acid sequence set forth in SEQ ID NO: 1 and a light chain variable region consisting of an amino acid sequence set forth in SEQ ID NO: 2; or

(2) an anti-CDH3 humanized antibody comprising a heavy chain variable region consisting of an amino acid sequence set forth in SEQ ID NO: 3 and a light chain variable region consisting of an amino acid sequence set forth in SEQ ID NO: 4.
