(54) Title: RAZOR BLADE AND CARTRIDGE INCLUDING SAME AND METHOD OF MAKING SAME

(57) Abstract

A strengthened blade for a shaving razor including a generally flat blade member having a width along a width axis, a length along a transverse length axis, and smaller dimensions along a thickness axis that is normal to both the width axis and the length axis, the blade member having a nonlinear front cutting edge defined by a plurality of waves having crests and valleys extending above and below the length axis in a direction that is parallel to the thickness axis.
