(54) Title: AUTHENTICATION USING AUGMENTED REALITY FACIAL EXPRESSION AND BODY MOTION TRACKING

FIG. 2

(57) Abstract: In some embodiments, a system includes a processor and a non-transitory computer readable medium coupled to the processor, wherein the non-transitory computer readable medium includes code that: requests a comparison user expression from a user of an application of a user device; maps the comparison user expression to a comparison blend shape coefficient and a comparison blend shape coefficient value at the authentication server; requests from the authentication server, an authentication user expression from the user of the application on the user device; maps the authentication user expression to an authentication blend shape coefficient and an authentication blend shape coefficient value at the authentication server; and utilizes the authentication user expression and the comparison user expression to authenticate the user of the user device.
