(54) Title: METHOD AND SYSTEM FOR CONTROLLING ACCESS TO DATA

FIG. 4

(57) Abstract: A method for controlling access to a set of data is provided. The method includes receiving, via an interface, a request from an agent to access the set of data in a database; extracting an access criterion relating to a predefined data access constraint and a predetermined data access policy from the request; and determining whether the agent is granted access to the set of data using the criterion, where the access criterion is based on an attribute that is associated with an element within the set of data.
