

Figures:

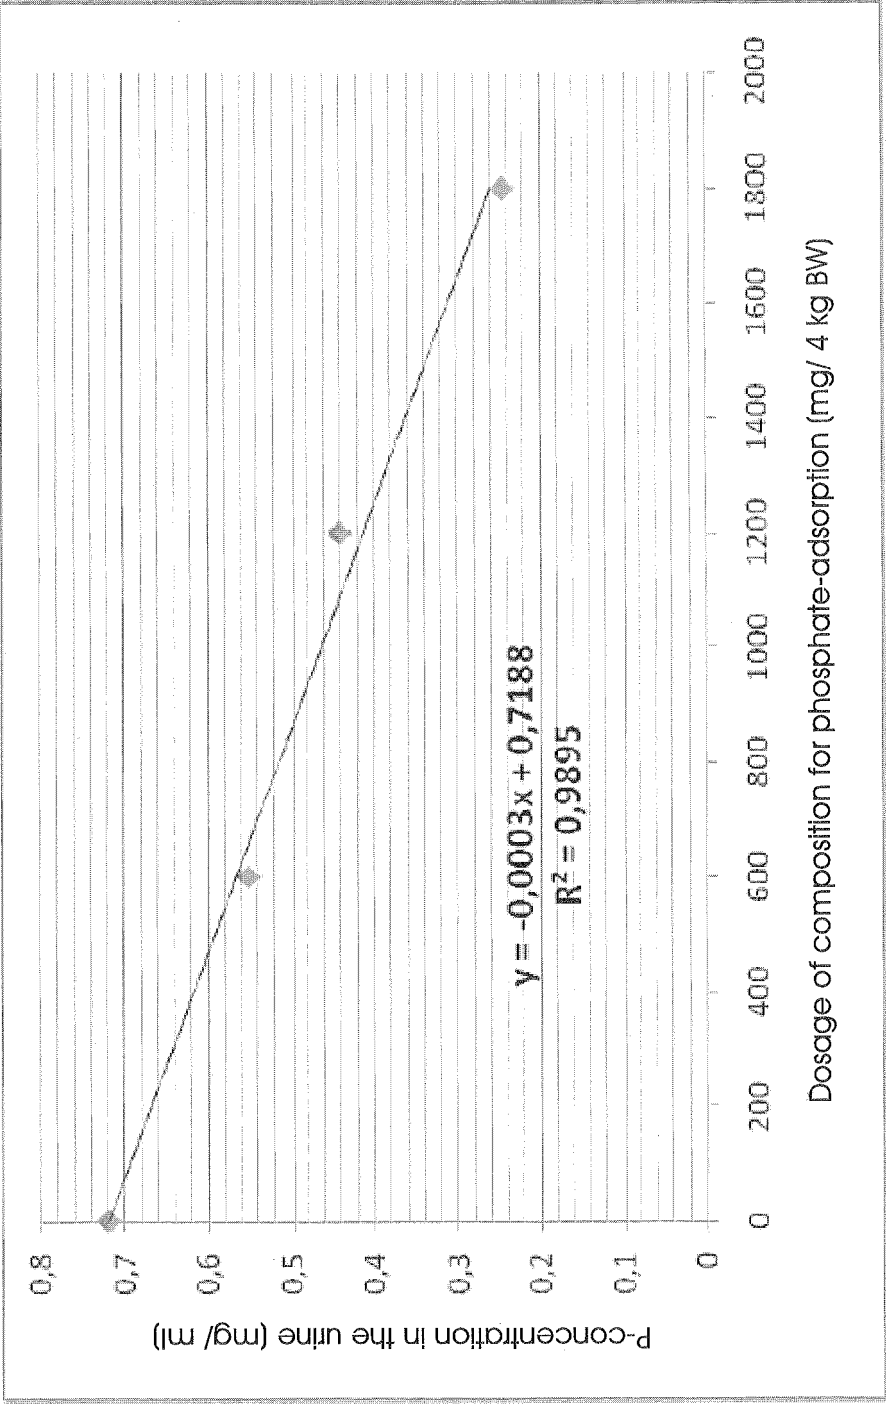

Figure 1:
Phosphorus concentration in the urine of cats fed with a phosphate-adsorbing composition according to the present invention

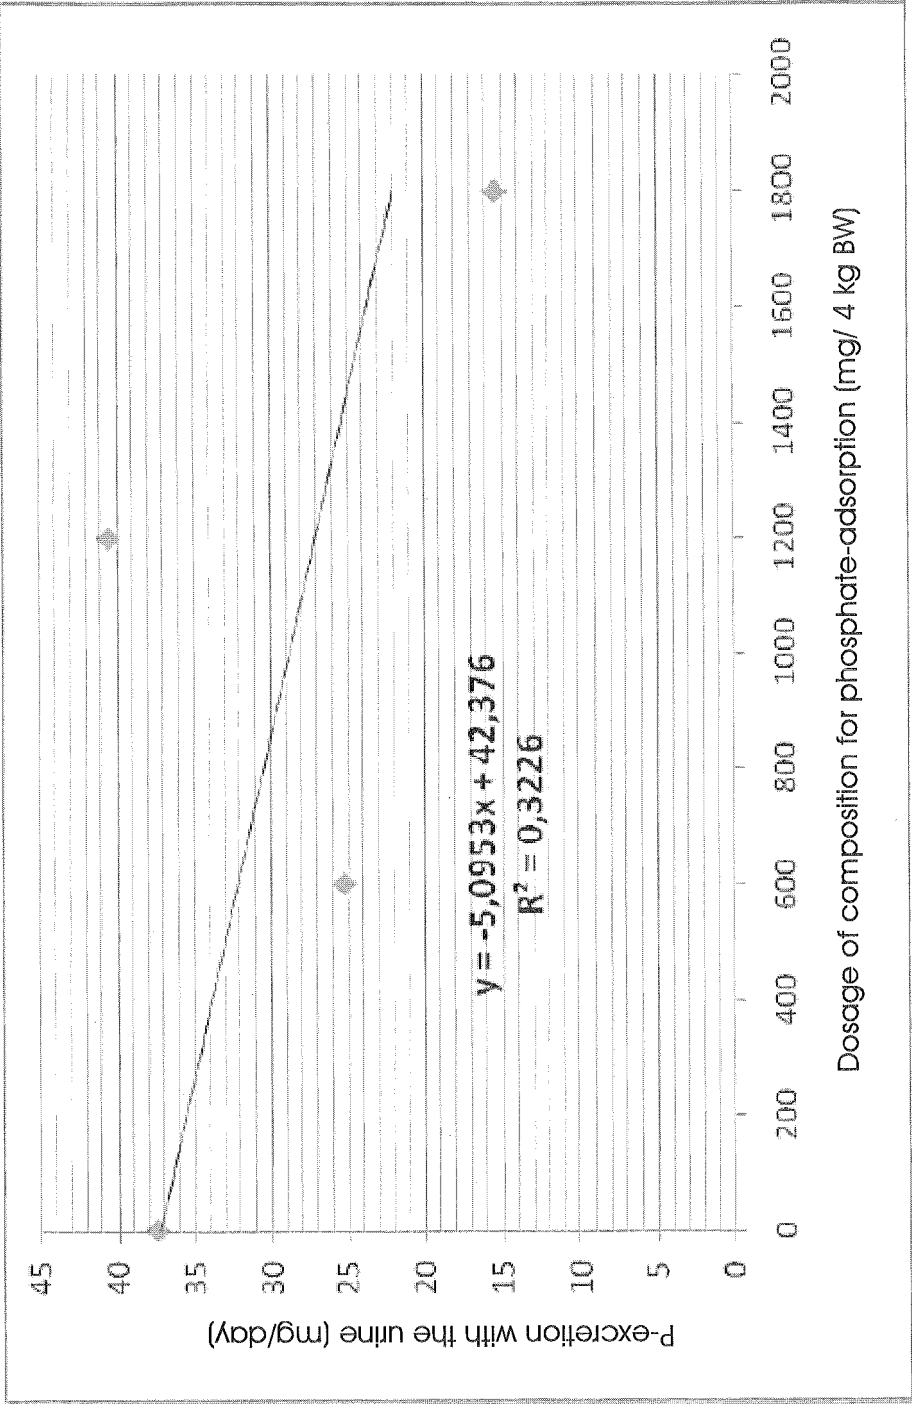

Figure 2:

Renal phosphorus excretion of cats fed with a phosphate-adsorbing composition according to the present invention

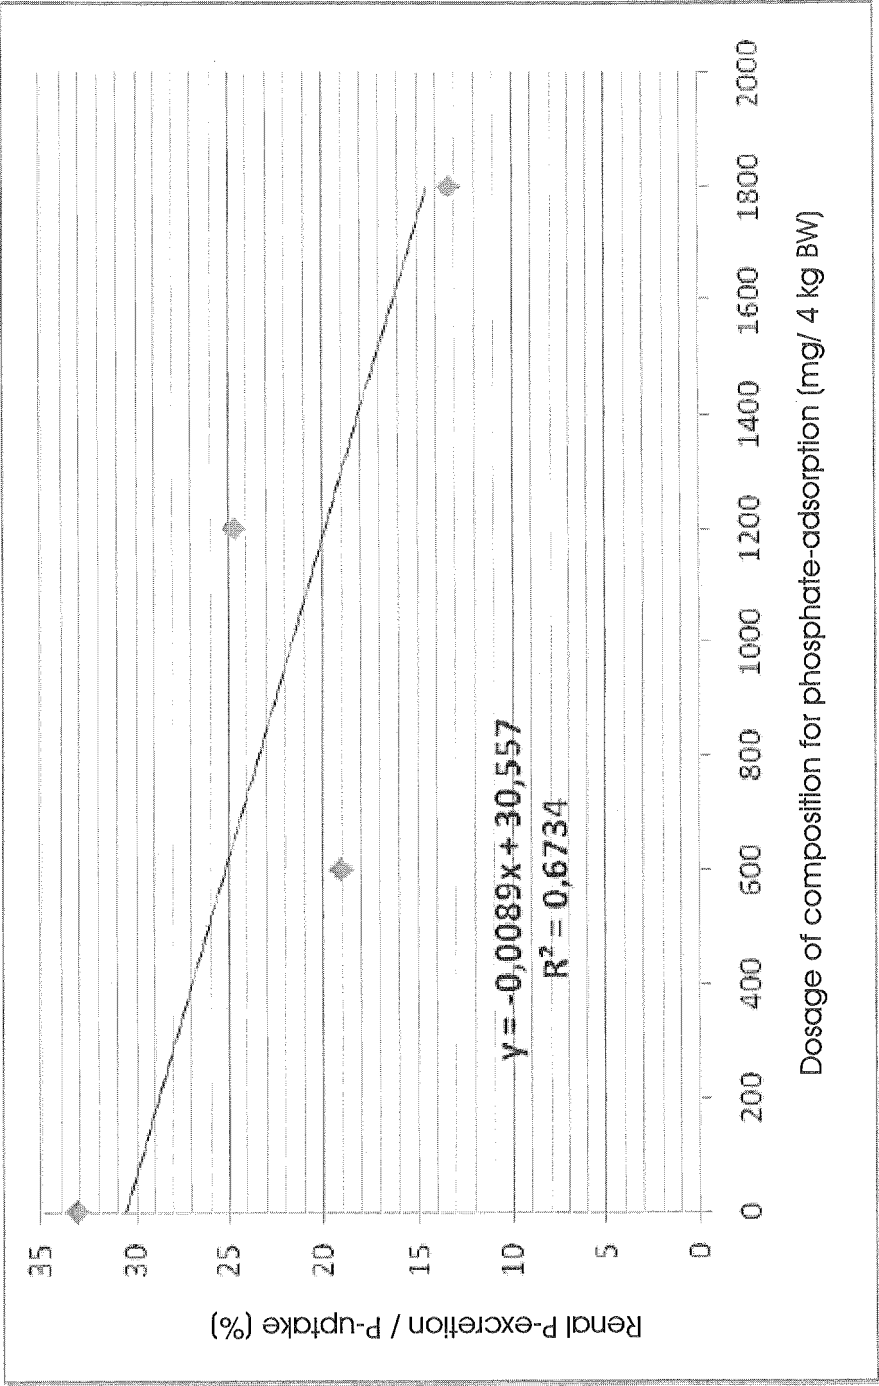

Figure 3:

Renal phosphorus excretion in relation to the phosphorus uptake (%) of cats fed with a phosphate-adsorbing composition according to the present invention

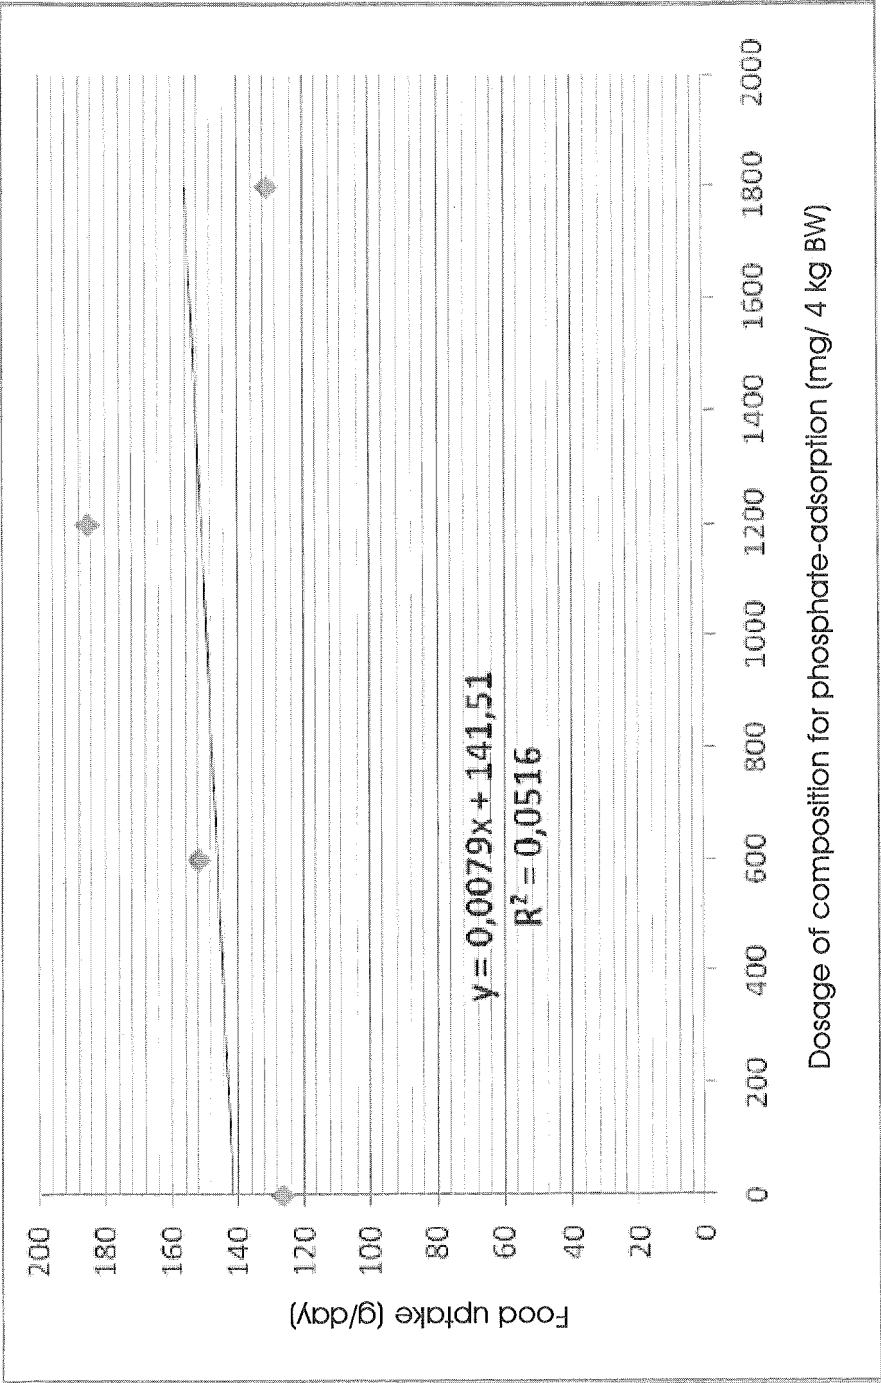

Figure 4:
Daily food uptake of cats fed with a phosphate-adsorbing composition according to the present invention

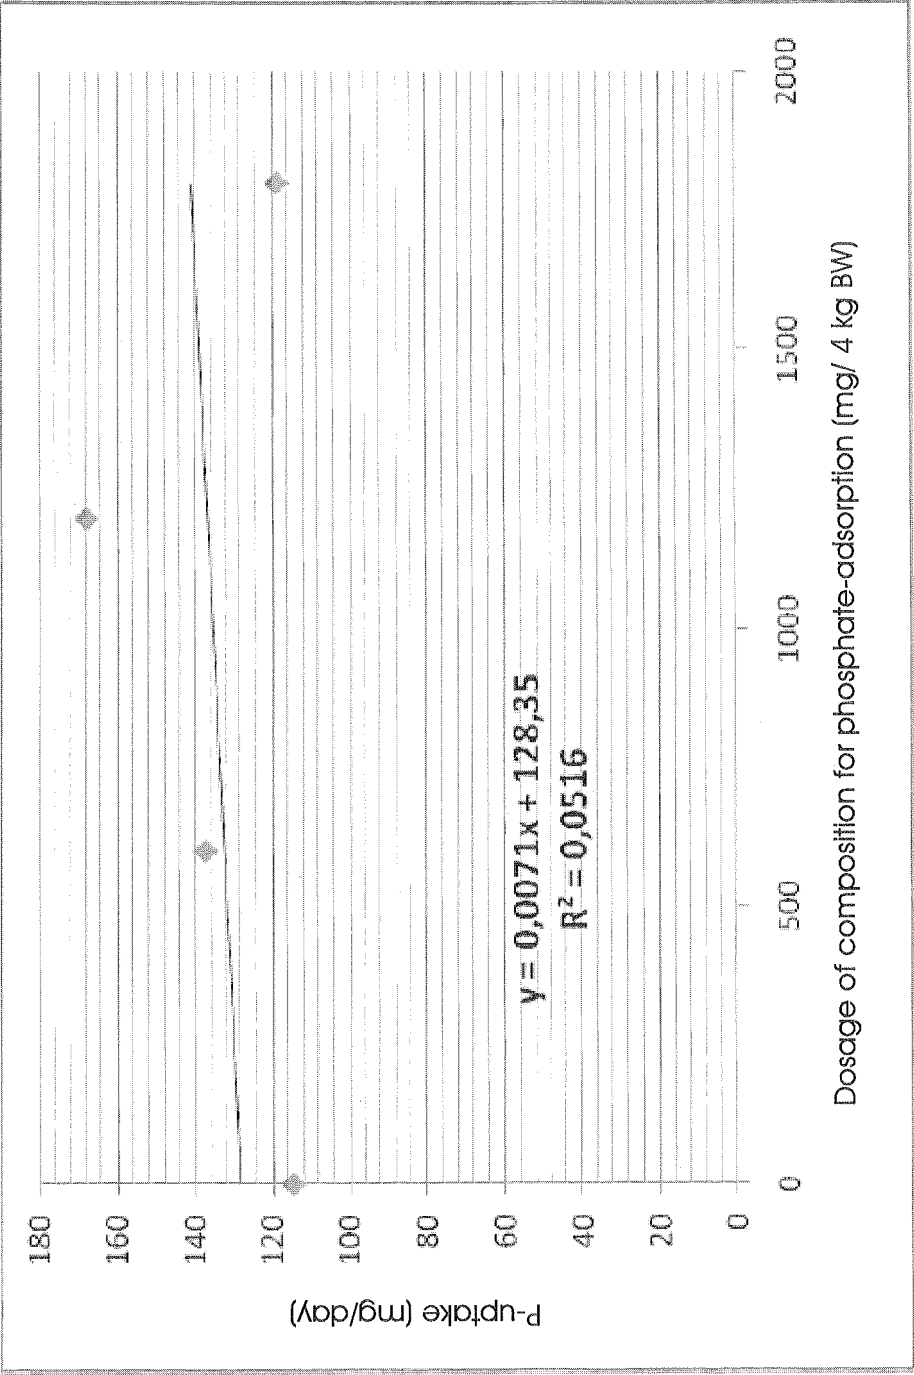

Figure 5:
Daily phosphorus uptake of cats fed with a phosphate-adsorbing composition according to the present invention

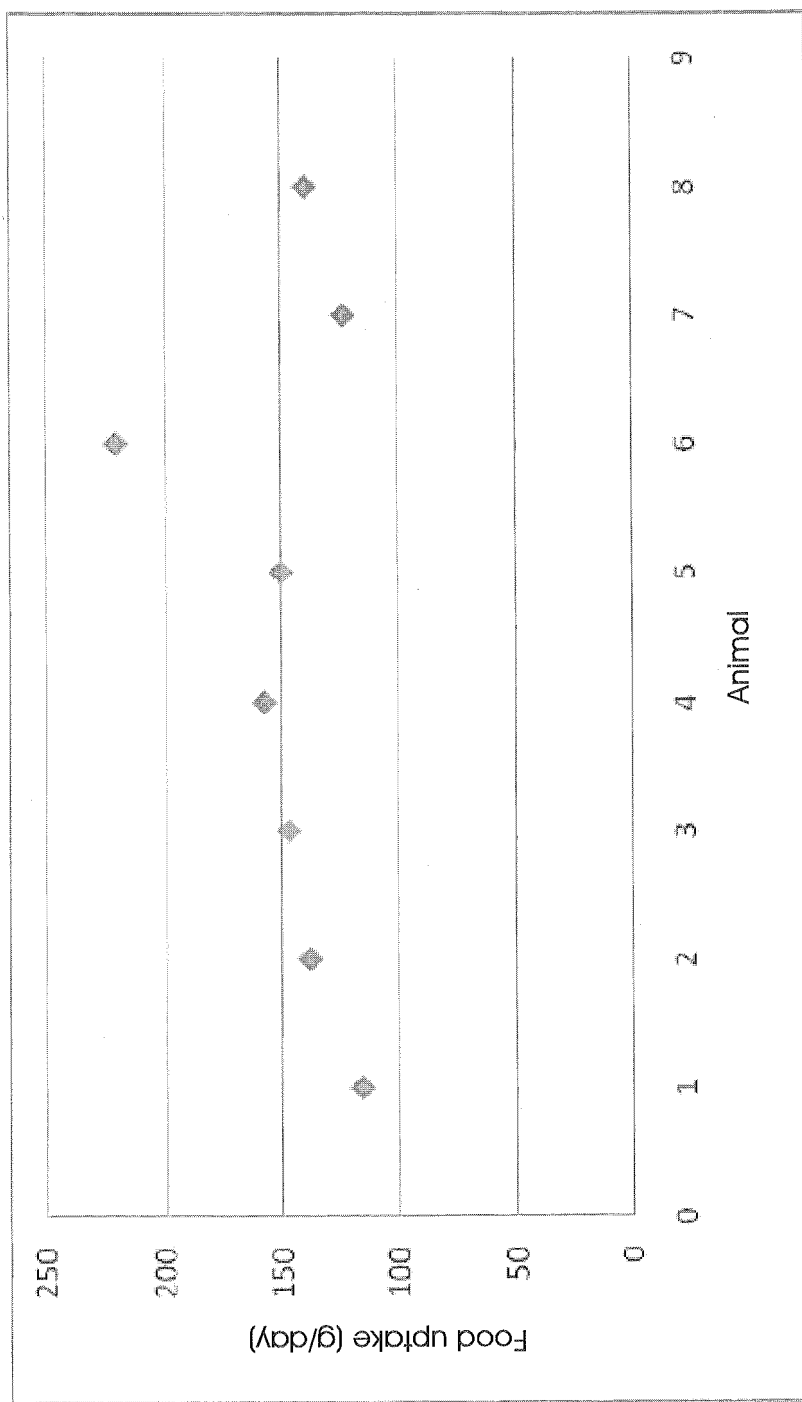

Figure 6:

Daily food uptake of cats fed with a phosphate-adsorbing composition according to the present invention (individual data)

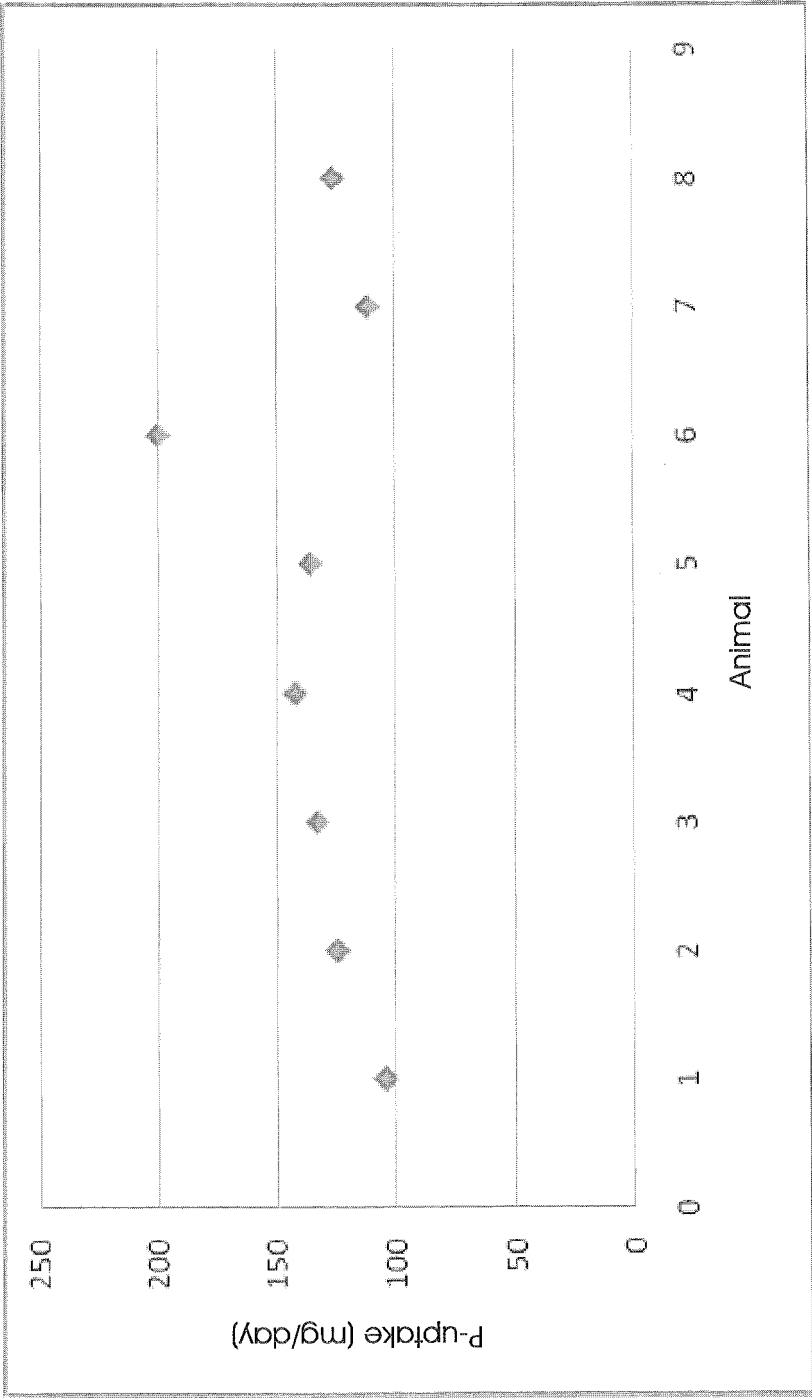

Figure 7:

Daily phosphorus uptake of cats fed with a phosphate-adsorbing composition according to the present invention (individual data)

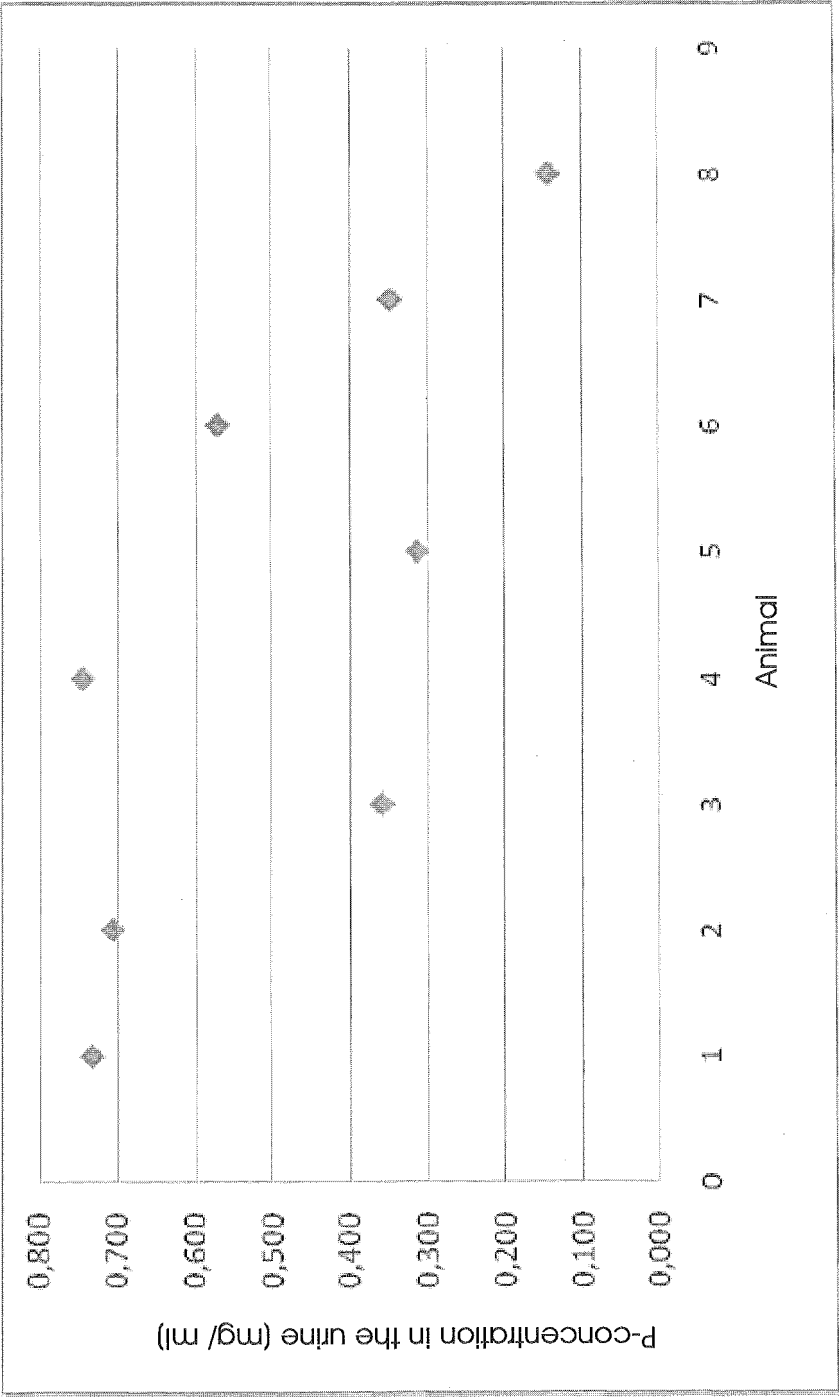

Figure 8:
Phosphorus concentration in the urine of cats fed with a phosphate-adsorbing composition according to the present invention (individual data)

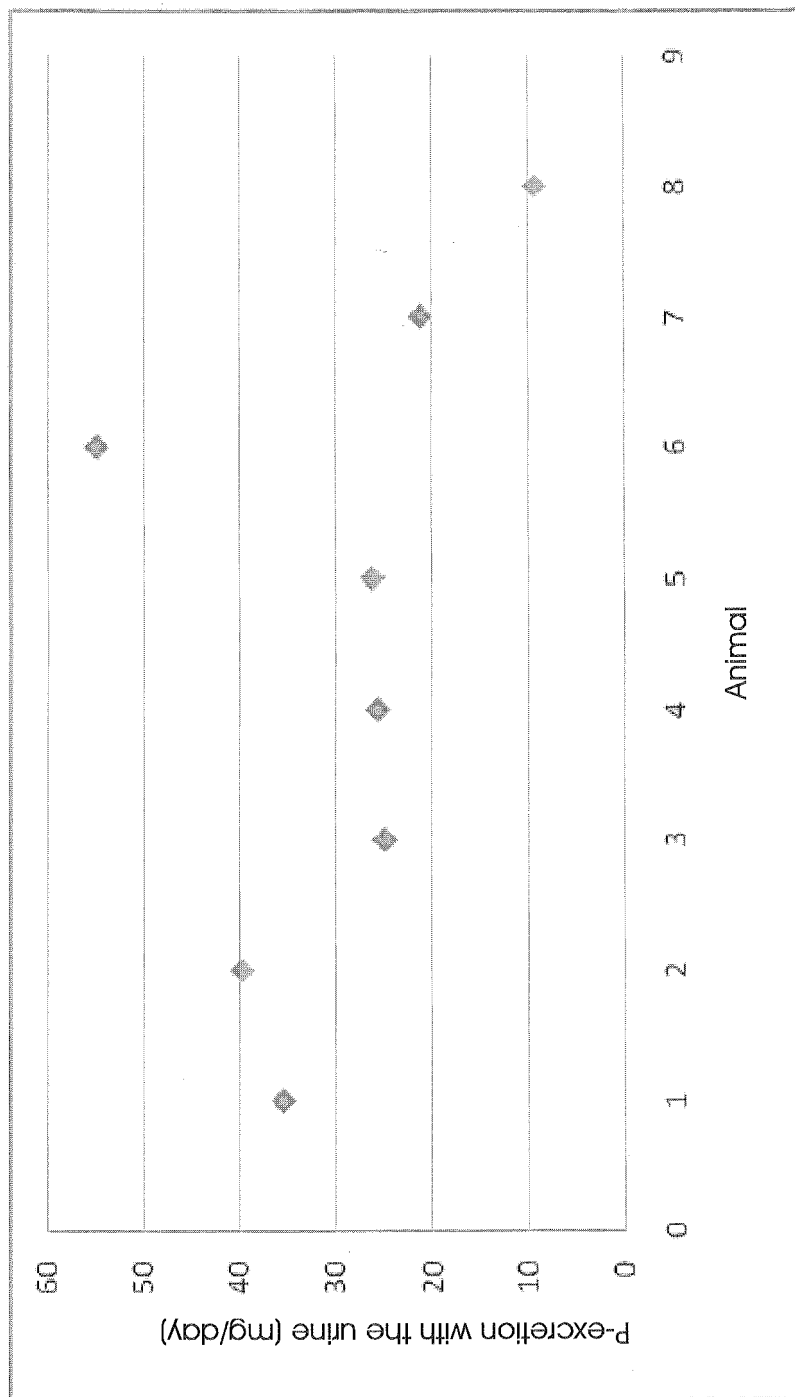

Figure 9:

Renal phosphorus excretion of cats fed with a phosphate-adsorbing composition according to the present invention
(individual data)

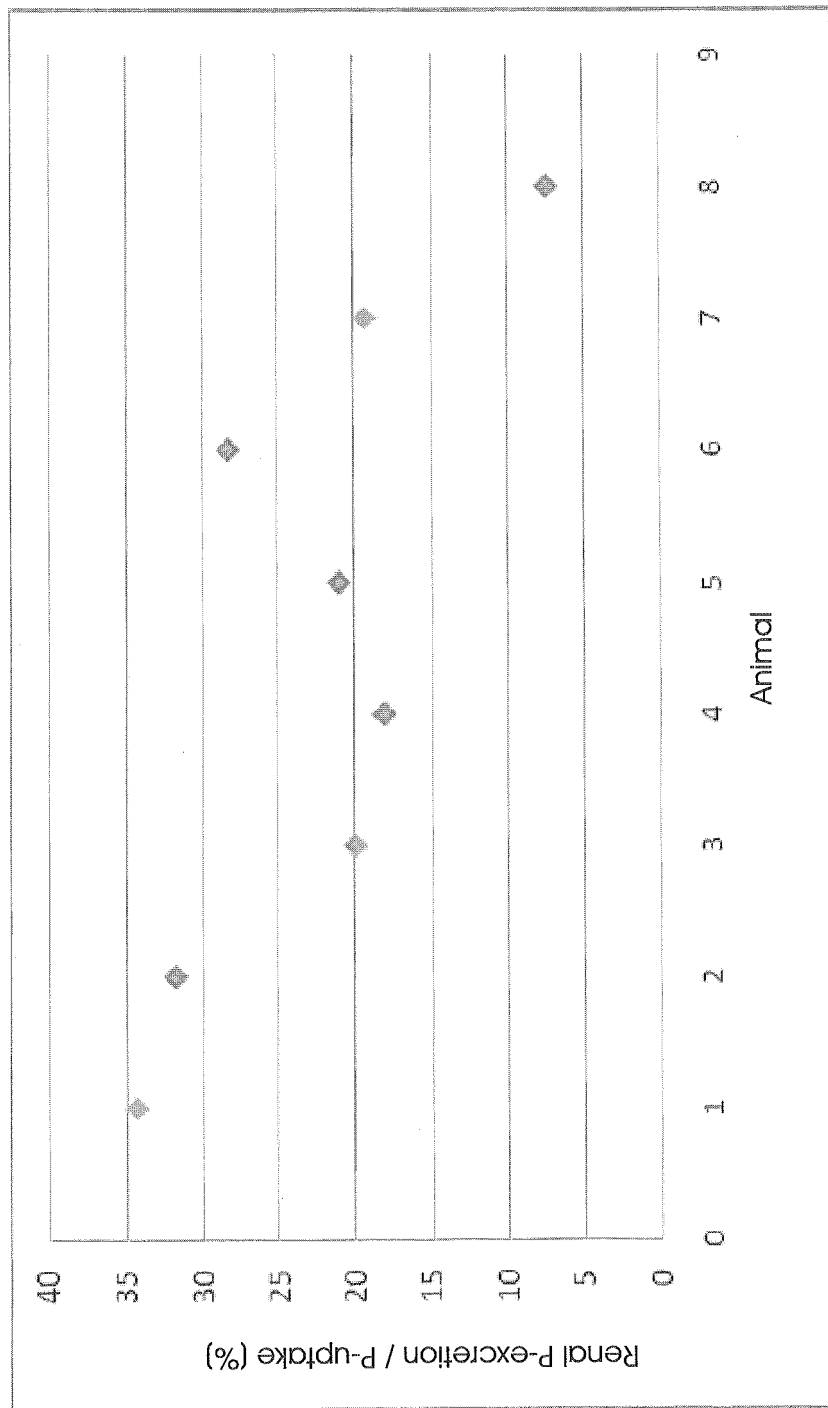

Figure 10:

Renal phosphorus excretion in relation to the phosphorus uptake (%) of cats fed with a phosphate-adsorbing composition according to the present invention (individual data)
