

COATING FILM REMOVING METHOD AND COATING FILM REMOVING
EQUIPMENT FOR REMOVING COATING FILM FROM COATED FILM

ABSTRACT

5 There is provided a coating film removing method that
can remove a coating film at a high speed by dissolving
from the surface of a coated film including the coating
film containing a water-soluble resin the water-soluble
resin in a short time using a solvent. The coating film
10 removing method for removing the coating film from the
coated film according to the present invention is the
method for removing the coating film from the coated film
including the coating film on at least one surface of a
base film, and includes: forming a scratch, a cut, or a
15 hole in a coating film on a surface on a coating film side
of the coated film, or forming the scratch, the cut, or the
hole that reaches the coating film on a surface on a no
coating film side of the coated film; then bringing a
cleaning liquid into contact with the coating film; and
20 then removing the coating film containing the cleaning
liquid from the coated film.
