[CLAIMS]

【Claim 1】

A composition for improving a sebum-controlling ability of a sunscreen which comprises bowl-like non-porous microparticles comprising a polymer matrix in which bis-ethylhexyloxyphenol methoxylphenyl triazine is dispersed as an active ingredient,

wherein the bowl-like non-porous microparticles have a surface porosity of 0,

wherein a sebum absorption of the microparticles is 0.5-1 mL/g, and

wherein a sebum intrusion volume of the microparticles is 1.0-1.5 mL/g.

【Claim 2】

The composition according to claim 1, wherein the bis-ethylhexyloxyphenol methoxylphenyl triazine is comprised in an amount of 20-30 wt% based on the total weight of microparticles.

【Claim 3】

The composition according to claim 1, wherein an average diameter of the microparticles is 1-10 μm.

【Claim 4】

The composition according to claim 1, wherein the polymer matrix comprises bis-ethylhexyloxyphenol methoxylphenyl triazine, and polymerizate of polymerizable monomers with a multi-functional crosslinking agent.

【Claim 5】

The composition according to claim 4, wherein the polymerizable monomer comprises at least one selected from the group consisting of: at least one aromatic vinyl monomer selected from the group consisting of styrene, methylstyrene, ethylstyrene, fluorostyrene, chlorostyrene and vinyltoluene; and at least one acrylic vinyl monomer selected from the group consisting of methyl (meth)acrylate, ethyl (meth)acrylate, butyl (meth)acrylate, octyl (meth)acrylate, stearyl (meth)acrylate, benzyl (meth)acrylate and glycidyl (meth)acrylate.

【Claim 6】

The composition according to claim 4, wherein the multifunctional crosslinking agent comprises at least one selected from the group consisting of divinylbenzene, ethylene glycol dimethacrylate, diethylene glycol dimethacrylate, triethylene glycol dimethacrylate, trimethylene propane trimethacrylate, 1,3-butanediol dimethacrylate, 1,6-hexanediol dimethacrylate and tri(meth)acrylate.

【Claim 7】

The composition according to claim 1, wherein the composition comprises the microparticles in an amount of 1-50 wt% based on the total weight of the composition.

【Claim 8】

The composition according to claim 1, wherein the composition is a water-in-oil (W/O) type composition.

【Claim 9】

The composition according to claim 1, wherein the composition is a make-up cosmetic product.

【Claim 10】

The composition according to claim 1, wherein the composition is for use in prevention of fine dust adsorption.
