(54) Title: APPARATUS AND METHOD FOR DEDICATED INTERCONNECTION OVER A SHARED EXTERNAL BUS

(57) Abstract: Apparatus and methods to control an external bus. In one embodiment, an apparatus includes an external bus port and an external bus controller. The external bus controller can include a first register interface to receive a first set of data and a second register interface to receive a second set of data. The external bus controller can send the first set of data and the second set of data to said external bus port.
