

Abstract

INFORMATION RECEIVING METHOD AND APPARATUS, INFORMATION SENDING METHOD AND APPARATUS, AND DEVICE AND STORAGE MEDIUM

Disclosed in the present application are an information receiving method and apparatus, an information sending method and apparatus, and a device and a storage medium. The information receiving method comprises: acquiring first information, the first information being carried by a media access control (MAC) control element (CE) or downlink control information (DCI), wherein the first information is used for indicating at least one of the following: whether to switch to a first cell; whether to activate a radio resource control (RRC) configuration of the first cell; whether to bring the RRC configuration of the first cell into effect; and the first cell is a candidate target cell.
