claims and to be republished in the event of receipt of  
amendments (Rule 48.2(h))

(54) Title: DIAGNOSTIC METHODS

(57) Abstract: A method for analyzing a disease state of a subject includes characterizing the subject's genetic information at two or more time points or instances with a genetic analyzer, e.g., a deoxyribonucleic acid (DNA) sequencer, and using the information from the two or more time points or instances to produce an adjusted test result in the characterization of the subject's genetic information.
