

[Document Name] Abstract

It is intended to provide a novel compound or a salt thereof, or crystals of the compound or the salt, which inhibit Ax1 and are useful in the treatment of a disease caused by hyperfunction of Ax1, the treatment of a disease associated with hyperfunction of Ax1, and/or the treatment of a disease involving hyperfunction of Ax1.

[Solution]

The present invention provides a pyridone derivative having a tetrahydropyranylmethyl group represented by the following formula (I) having various substituents, or a salt thereof, or crystals of the compound or the salt (wherein R₁, R₂, R₃, R₄, R₅, W, X, Y, and Z are each as defined in the specification).

Formula (I)
