- (54) Title:** BEVERAGE DISPENSING DEVICE

FIG. 1

(57) Abstract: A beverage dispenser that is enabled for on demand, gravity fed dispensing of a pre-mixed or otherwise ready to drink beverage that has been thermally regulated through natural convection. More specifically, the beverage dispenser enables pre-mixed or otherwise ready to drink beverage containers (i.e., beverage containers with beverage contents that are pre-mixed or otherwise ready to drink) to be installed on the beverage dispenser and, without the aid of electricity or electro-mechanical devices, dispense a thermally regulated beverage on-demand to an intended customer. The beverage dispenser may comprise a thermal regulation compartment that facilitates regulating the temperature of beverage contents through natural convection. The beverage dispenser may also comprise a thermally regulated and thermally insulated beverage enclosure in which to install the beverage containers, The thermal regulation compartment may be earned within the beverage enclosure.
