

ABSTRACT

5 In the non-contact power supply system 110, an area of AC power supply is set to each of a plurality of non-contact power supply devices 1A, 1B, 1C, 1D, and 1E, each of a plurality of feeders 12A and 12B is provided in the corresponding area, and an electrostatic coupling unit 112 is included that is configured to electrostatically couple the one non-contact power supply device and other non-contact power supply device to each other.
