(54) Title: ON-BOARD SYSTEMS FOR TRAINS AND METHODS OF DETERMINING SAFE SPEEDS AND LOCATIONS OF TRAINS

Fig. 1

(57) Abstract: A method for determining a safe speed of a train is presented. The safe speed is determined based on the detection range of a sensor system of the train (130). The detection range is determined based on the current location of the train and a data store comprising information from which the detection range at a plurality of locations on the railway can be determined (120).
