(54) Title: **CLAMPING DEVICE FOR A CONNECTION TERMINAL**

(54) Titre : **DISPOSITIF DE SERRAGE POUR UNE BORNE DE RACCORDEMENT**

(57) Abstract: A connection terminal clamping device (2) clamping a conductor wire (3) to a connection conductor bar (4) comprises a part forming a conductor housing (5) provided with at least one upwardly oriented opening for receiving at least one connectable conductor wire (3) and the connection conductor bar (4), a clamping spring (13) which maintains the conductor wire (3) introduced into a housing-forming part in position against the conductor bar (4) by means of an elastic force and which comprises a first connecting arm (15) formed by the extension of a wall defining said housing-forming part (5) and connected by an elbow (16) to a second clamping arm (17) provided with a free clamping end (18).

(57) Abrégé : Dispositif (2) de serrage pour une borne de raccordement par serrage d'un fil conducteur (3) à une barrette de liaison conductrice (4), comprenant une partie formant un logement (5) de conducteur, comprenant au moins une ouverture vers le haut destinée à recevoir au moins un fil conducteur (3) à raccorder, ainsi que la barrette de liaison conductrice (4), un ressort de serrage (13) destiné à maintenir en position le fil conducteur (3) introduit dans la partie formant logement contre la barrette de liaison (4) en appliquant

une force élastique, le ressort de serrage (13) comportant une première branche de liaison (15) formée par un prolongement d'une partie d'une paroi (14) délimitant la partie formant logement (5), reliée par un coude (16) à une seconde branche de serrage (17) présentant une extrémité libre de serrage (18).
