(54) Title: INTELLIGENT CARD UNLOCK

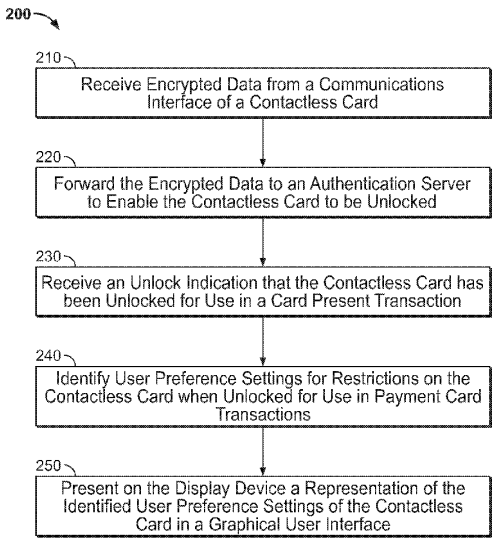

FIG. 2A

(57) Abstract: Various examples generally directed to unlocking a locked contactless card for use as payment in card-present transactions are provided. The contactless card is a payment card associated with a payment account. An application executing on a mobile device may be operable to enable unlocking the locked contactless card and receive an indication that the contactless card associated with the mobile device is unlocked for use in card-present transactions. The application may present information related to permitted uses of the unlocked contactless card via a graphical user interface. The permitted uses of the unlocked contactless card may be modified via the graphical user interface.
