

ABSTRACT

Provided is an antiperspirant composition capable of forming a uniform film on the skin. The antiperspirant composition of the present invention contains ammonium glycyrrhizate (component A), aluminum chlorohydrate (component B), ethanol (component C), and water (component D), in which a content of the component A is 0.05 mass% or more and 1.0 mass% or less, a content of the component B is 3.0 mass% or more and 30.0 mass% or less, a mass ratio of the content of the component C to the content of the component A is 20.0 or more, a mass ratio of the content of the component D to the content of the component A is 10.0 or more, and a mass ratio of the content of the component D to the content of the component B is 0.8 or more.
