(54) Title: METHOD OF DELIVERING NUCLEIC ACID MOLECULES INTO EMBRYONIC STEM CELLS USING BACULOVIRAL VECTORS

(57) Abstract: There is provided a method of delivering a nucleic acid molecule to an embryonic stem cell, including a human embryonic stem cell, by infecting the embryonic stem cell with a baculoviral vector comprising the nucleic acid molecule. Embryonic stem cells transduced by this method are useful for treating a disease or disorder in a subject.
