

METHOD AND APPARATUS FOR UTILIZING LADN IN WIRELESS COMMUNICATION SYSTEM

【ABSTRACT】

It is disclosed a method for utilizing LADN in a wireless communication
5 system and an apparatus for the same. Particularly, the method of establishing a
protocol data unit (PDU) session for a local area data network (LADN) service by a
user equipment (UE) in a wireless communication system may include transmitting
to an Access and mobility Management Function (AMF), a registration request
including information for informing a request of LADN information for the LADN
10 service; receiving, from the AMF, a registration accept for informing that the
registration request is accepted, the registration accept including the LADN
information; and establishing a PDU session for the LADN service by performing a
PDU session establishment procedure.
