

ABSTRACT

PHARMACEUTICAL COMPOSITION OF PHENOL DERIVATIVE HAVING
IMPROVED STABILITY AND USE THEREOF

A pharmaceutical composition of a phenol derivative and use thereof. The pharmaceutical composition comprises the following components: an active ingredient, a thickening agent, an emulsifier, a humectant, a chelating agent, a pH regulator, an oil phase matrix, and water, wherein the active ingredient is selected from at least one of a compound of formula (I) and a pharmaceutically acceptable salt thereof; the active ingredient is dispersed in a homogeneous and uniform emulsion drop form and has good physical and chemical stability. The composition is suitable for the treatment of atopic dermatitis, psoriasis and seborrheic dermatitis, especially for the treatment of atopic dermatitis and seborrheic dermatitis of children, and has good safety, stability, and effectiveness, and uniform morphology characteristics.
