(54) Title: INTERFACE FOR NON-VOLATILE MEMORIES

(57) Abstract: A portable storage device for storage of data. The portable storage device comprises a first non-volatile memory of a first character; a second non-volatile memory of a second character, the second character being different to the first character; and a controller for determining to which of the first and second non-volatile memory the data is to be sent. The determining is based on a defined relationship between the first and second non-volatile memories, the defined relationship being buffer or backup.
