PYRIDYL- AND PYRIMIDINYL-SUBSTITUTED PYRROLE-, THIOPHENE- AND FURANE-DERIVATIVES AS KINASE INHIBITORS

ABSTRACT

The present invention provides compounds of the formula (I), or the pharmaceutically acceptable salts thereof, wherein G, W, R_2, R_3, R_4, R_5 and R_6 are as defined in the specification. Further objects of the invention are processes and intermediates for the preparation of the compounds of the formula (I), pharmaceutical compositions comprising them and methods for treating cell proliferative disorders. As a matter of fact, the compounds of the formula (I) are useful, in therapy, in the treatment of diseases associated with a disregulated protein kinase activity, like cancer.
